Water for You!

PREMIUM REVERSE OSMOSIS WATER

PURE  H2O

Water for Health. Water for Life.

Water is Health

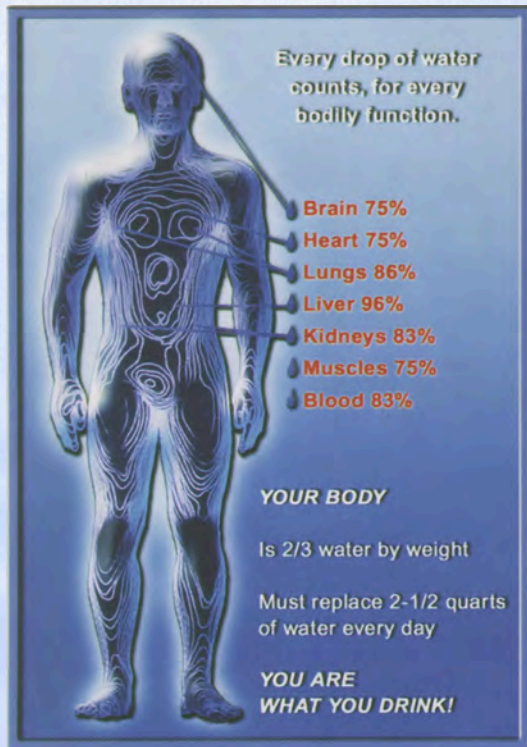

Water is vital to our survival, it is second only to the air we breathe. Water is essential for every bodily function and makes up over 75% of the human body. Water carries nutrients to your cells and cleanses the body, flushes out vital organs and is a lubricant to the limbs and joints.

Most health authorities recommend that for a healthy lifestyle you should drink eight or more glasses of water per day.

Many diet programs consider water an essential part of a weight loss plan.

Purified water contains no calories, no preservatives, no artificial colour and no artificial flavours.

Make Pure Water Your #1 Drink!

How Do We Purify Our Water?

We use the best proven technologies to produce healthy, great tasting water that is made fresh daily and naturally without the use of chemicals.

PURE H2O FILTRATION PROCESS

Tap Water

From local municipal water system.

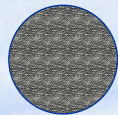

Ion Exchange

Pre-treats water to remove reddish brown iron and scaling minerals.

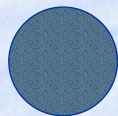

Sediment Filtration

Reduces particles such as dirt, rust, silt and oxidized iron.

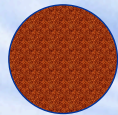

Activated Carbon Filtration

Removes unpleasant taste and odor, chlorine, THM's volatile organic contaminants, herbicides and pesticides.

Reverse Osmosis Membrane

Water is forced under pressure through an ultra fine membrane which removes up to 99% of dissolved solids such as lead, copper, sodium, nitrates, lead, mercury, mineral salts and bacteria.

Carbon Block Filtration

Removes organic chemicals and polishes the purified water for superior taste.

Ultraviolet Sterilization

Provides protection against bacteria and microbiological contaminants.

Independently Tested and Inspected Water quality is monitored and tested periodically by an independent laboratory. Our Water System is inspected and maintained by a qualified technician.

Enjoy the Benefits of Purified Water

It's Fresh

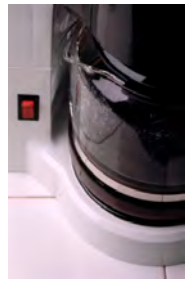

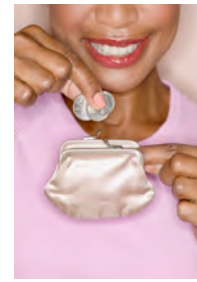

Unlike pre-bottled water your water is produced fresh.

Essential to Good Health

Tastes so good you'll easily drink your recommended eight glasses of water a day.

Economical

The most economical beverage available.

Better Tasting

From ice cubes to iced drinks, soups to sauces, frozen vegetables to fruit juices, baby formula to baby food, everything you use water for will taste better.

Protects Appliances

No scale build up in your coffee maker, tea kettle, humidifier or iron.

Pure Drinking Water

Water free of impurities and contaminants, giving you and your family peace of mind.

Why Buy Pure H²O Premium Reverse Osmosis Water

It's Produced Fresh!

Unlike pre bottled water, your water is produced fresh daily without storage in a warehouse.

It Tastes Great!

Premium Reverse Osmosis Water is free from impurities, chlorine, and other harmful contaminants, which may cause water to taste or smell badly.

It Saves You Time!

Refilling your own bottles or having to purchase water at supermarkets takes time. We deliver the water to your home or office at no extra charge.

It's the Best Quality!

Pure H₂O dispensers are maintained by qualified technicians, who continually monitor, test and service all equipment.

It Helps the Environment!

Eliminates plastic containers that are filling our landfills and eliminates transportation pollution

PURE H₂O  **Water for Health. Water for Life.**
